“A good estimate is an estimate that provides a clear enough view of the project reality to allow the project leadership to make good decisions about how to control the project to hit its targets.”

* Steve McConnell in “Software Estimation”

$$E = a_i (\text{KLoC})^{(b_i)} \cdot \text{EAF}$$

Estimates

Remember, it's
ESTIMATION,
not
EXACTIMATION

* Jim Holmes during his Kalamazoo X Conference talk

Problems with Over-estimating

Problems with Under-estimating

Why are we so bad?

What can we do?
