Fail fast

HOT DOG WITH EYE SAULT

Time Line

Introduction

Jan, 2010

Time Line

We have 3 months
to prove it works or
out

Challenges

- How to gently introduce Agile?
- How to decide what is most valuable and important problem to solve?
- Deciding about the right tool for the job?
- ...

Things we did

- Agile boot-camp
- Introduced value based delivery model
- Selected the right tool
- Stories are prioritized based on ROI
- Started with 6 member team
- ...

**Working software
in production in 6
weeks**

Real Artists ship

Steve jobs

Things Happened

- Started to get attention from other teams and their managers
- Our product owner became the Agile advocate of the organization
- Transformed other teams to Agile except one
- ...

Challenges

- How to grow teams in Agile?
- How to hire right people?
- Availability of product owners
- Keeping focus on long running projects? Delivery value?
- Tracking velocity vs. throughput?
- ...

Things we did

- Created balance between experience and novice agile developers
- Informal code reviews
- Putting right people on the bus
- BSAs wear multiple hats
- Stopped tracking velocity
- ...

and very
importantly...

Things Happened

- Changed HR selection process
- Across department communication improved
- All teams embraced agile in their own way
- ...

THE A TEAM

Present

Time Line

Challenges

- Managing builds and deployments
- Create user documentation & training
- Manage multiple backlogs
- Growing new leaders and transition
- Doing maintenance with new development
- ...

First thing we did

30.05.2009 04:25

Also...

- Build engineer role at organization level
- Created one enterprise backlog
- Rotating team members between projects
- Evolving process all the time
- Reducing support system of consultants
- ...

Things Happened

I am yet to find out

Thanks
